

Indian Institute of Technology Kanpur
Department of Mathematics and Statistics
Introduction to Bayesian Analysis (MTH422A)
Assignment 4, Due date: March 24, 2024, Sunday

Answers should be provided neatly. All rough work should be attached with the original submission, along with the original submission but not written together. Commented code should be provided as a separate .R file. If rough work is not shown and you cannot justify that the final answer can be thought very straightforwardly, you will be penalized for cheating. In case of cheating, all students involved will get zero. For R codes, please submit the Markdown file (.Rmd) as well as its PDF output. Thus, there should be a total of four/five files to be submitted—one PDF with neat solutions, one PDF with rough work (if necessary), one .R file containing the rough codes, one .Rmd file, and one .pdf which is the output of the .Rmd file.

1. Chapter 3, Question 10, 11 (1+2=3 points)
2. Chapter 3, Question 13 (2 points)
3. Chapter 3, Question 16 (2 points)
4. Chapter 4, Question 1 (1 point)
5. Chapter 4, Question 2 (2 points)
